

Breast Friends of Florida

Helping women survive the trauma of cancer...one friend at a time.

Breast Friends of Florida provides physical, emotional, social and spiritual support to breast cancer patients.

Every woman in American will be touched by breast cancer in her lifetime. One in eight women will be diagnosed with breast cancer. Our goal is to reach the seven, in order to help the one.

Often breast cancer patients, especially the newly diagnosed, are in the greatest emotional pain, but are the least able to ask for help.

Breast Friends:

- Teaches the family and friends of the cancer patient specific ways to offer support
- Helps them understand what the patient is going through
- Suggests useful resources for the patient and her family

Please join us at our annual Breast Friends luncheon

Friday, March 23, 11:00 am • Crowne Plaza Melbourne Oceanfront

Reservations required
